## EDUCATION

Northeastern University  
Bachelor of Sciences in Economics  
3.51 GPA

Boston, MA  
May 2027

**Relevant Coursework:** Micro/Macroeconomics, Economic Justice, Contested US Economic Issues, American Government

## EXPERIENCE

### **The Tutoring Center**

*Tutor*

Los Altos, CA  
Jan-June 2023

- Provided consistent tutoring support to middle school students multiple times a week; instructed students in algebra and English, adapting teaching methods to accommodate learning styles and ensuring understanding of complex material.
- Effectively managed and supported multiple students simultaneously, creating a dynamic learning environment.

### **Senator Josh Becker's Office**

*Intern*

Los Altos, CA  
June/July 2022

- Conducted comprehensive legislative research to support the development and analysis of policy proposals, thoroughly examining legal frameworks and data.
- Contributed to the creation of written content, including news reports and press releases, to effectively communicate key legislative initiatives and public policy updates to a broad audience.
- Provided research and operational support for Senator Becker's Project HomeKey, a statewide initiative focused on addressing homelessness by gathering data and assisting with program implementation strategies.

### **EverythingALS**

*Student Intern*

Los Altos, CA  
Nov 2021-July 2022

- Engaged in regular outreach to ALS patients enrolled in a speech study, providing support, collecting data, and ensuring patient involvement, assisting in the ongoing research focused on improving speech-related outcomes for ALS patients, while also providing support to individuals navigating the challenges of the disease.
- Participated in meetings with team members to discuss steps that need to be taken to continue researching preventative measures for ALS to contribute to the advancement of ALS research

### **Independent Chinese Economic History Research**

*Researcher*

Los Altos, CA  
Aug 2021-May 2022

- ["The Origins of Chinese Economic Growth"](#)
- Conducted literature reviews on Chinese Economic Reform Policies throughout the course of 8 months to understand the complex relationship between government policies and economic growth.
- Presented an 11-page paper on Polygence's Annual Student Scholar Symposium to share findings with a broader academic audience, engage in critical discussions, and contribute to the ongoing dialogue on global economic policy.

### **Independent Data Science Project**

*Researcher*

Los Altos, CA  
Apr 2021-May 2022

- ["The Moderating Impact of Positions on The Curvilinear Relationship Between Age and Performance"](#)
- Used Python to scrape and analyze data from NBA statistic archives to find the year of peak performance across different generations of players in order to gain a better understanding of the factors influencing peak performance in basketball.
- Learned to reformat and analyze data to determine critical trends within player performance categories to gain insights into how the performance of players has evolved across different eras. Learned to use Pandas Notebook.

### **Stock Investing/Valuation with Founder of 500 Startups**

*Investment Researcher*

Los Altos, CA  
June 2020-Aug 2021

- Analyzed company valuations, volatility, and discounted cash flow models to make decisions in investments.
- Created a research project to select 15-20 companies to invest in; saw portfolio gains of over 130% through a one year timeframe, which was more than triple the annual growth rates of the S&P 500 for the timeframe.

## SKILLS

Japanese (Fluent), Mandarin (Proficient), Python (Data Manipulation/Visualization), ChatGPT/OpenAI  
Microsoft Word, Excel (Conditional Formatting/Filters/Data Validation/Charts/Data Entry)/Suite, Google Docs/Sheets, Data Analysis, Financial/Economic Analysis (Valuations, volatility, and discounted cash flow models)
